NotePage, Inc. White Paper

Company Name: Bristol Myers Squibb

Web Address: bms.com

Industry: Corporation

Business / Organization Description:

One of the largest marketing communications networks in the world. They service more Fortune Global 500 companies in five or more countries than any other agency.

How is PageGate Used/Customer Quote:

We are using PageGate using the "Get Ascii" feature to notify our facilities staff of critical HVAC and Electrical Systems (UPS, Generator & Switchgear) alarms for a very large corporate Data Center. In addition we are using the email function to send pages that are then used perform shutdown functions of critical computer servers in the event of a power outage. The shutdown functions are performed by another vendor's application."

" PageGate is a tremendous enhancement to our Building Automation System and alarm management software application. Our alarm management software is manufactured by Automated Logic Corporation and is quite versatile but has always had a problem keeping up with the number of outgoing dialed pages that our Data Center generates. PageGate has handled as many as 2500 pages (thus far) during one facilities event to multiple pagers without even a hiccup. PageGate has been the answer we were looking for to solve our paging needs."

*Rick Stahmer, Project Manager
