NotePage, Inc. White Paper

Company Name: IBM – International Business Machines
Web Address: www.ibm.com
Industry: Computer / Corporation / Security

Business / Organization Description:
This specific division of IBM is responsible for virus certification, virus warnings and management.

How is PageGate Used/Customer Quote:
The IBM Virus Certification Division uses PageGate to alert internal and outscourced staff to critical alerts. Due to the nature of viruses, in addition to e-mail notification, critical alerts or viruses deemed a high priority are sent out via PageGate to cellular phones and pagers. These alerts notify personnel of the related risks, precautions and where additional information can be found.

The IBM Critical Operations team also utilizes PageGate, to inform employees of scheduled meetings on virus related situations.
