Company Name: National Academy of Sciences

Web Address: www.nas.edu

Industry: Non-Profit / Education / Government

Business / Organization Description:

The National Academy of Sciences (NAS) is a private, non-profit society of distinguished scholars. Established by an Act of Congress, signed by President Abraham Lincoln in 1863, the NAS is charged with providing independent, objective advice to the nation on matters related to science and technology. Scientists are elected by their peers to membership in the NAS for outstanding contributions to research. The NAS is committed to furthering science in America, and its members are active contributors to the international scientific community. Nearly 500 members of the NAS have won Nobel Prizes, and the Proceedings of National Academy of Sciences, founded in 1914, is today one of the premier international journals publishing the results of original research. The National Academy of Sciences is a Research Institution.

How is PageGate Used:

The National Academy of Sciences (NAS) uses PageGate to send alerts to Cell Phones as text messages. PageGate is used in conjunction with IPcheck software. When an alert is triggered in the IPcheck software PageGate uses the connected modem to dial a special 800 number that will send the text message alerts to ITS cell phones as text messages.
